- ▶ Turn Key projects in international markets are normally run with local assists.

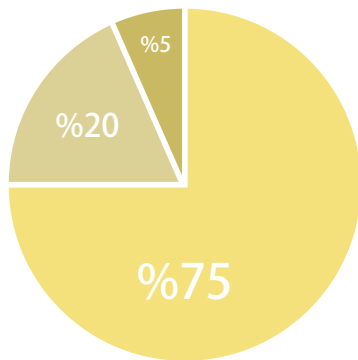

-
1. A grade in power contractors qualification
 2. Fabrication of more than 7°00,000 Metric tons steel structures
 3. Construction and implementation of over 2000 Km power transmission lines range from 63 to 400KV
 4. Exporting more than 60,000 metric tons structures
 5. Production capacity of 35,000 MT annually
 6. Testing numerous new types successfully
 7. Coding Yas Tower an exclusive designing software
 8. Top exporter in 2016
-

► Design, Manufacture
and Installation of
transmission
towers up to 500KV

PRODUCTS

- TRANSMISSION TOWERS
- TELECOMMUNICATION TOWERS
- OTHER STRUCTURES

MAIN PRODUCT

TRANSMISSION TOWERS

Various types of tower are designed and manufactured in YASAN. The best quality of raw materials are supplied from reputed suppliers from Iran and other countries. Strategic location of company enables to minimize transportation costs to keep prices as competitive as possible. Few - minutes distance to test station made testing process easy and progressive. Final products are randomly supervised by QC team and packed in standard form to protect parts from possible erosion and damages.

- Telecommunication towers are also manufactured in the company to serve communication markets. Contribution of a French company helped us to expand this market.

INTERNATIONAL DEVELOPMENTS

HEART OF COMPANY

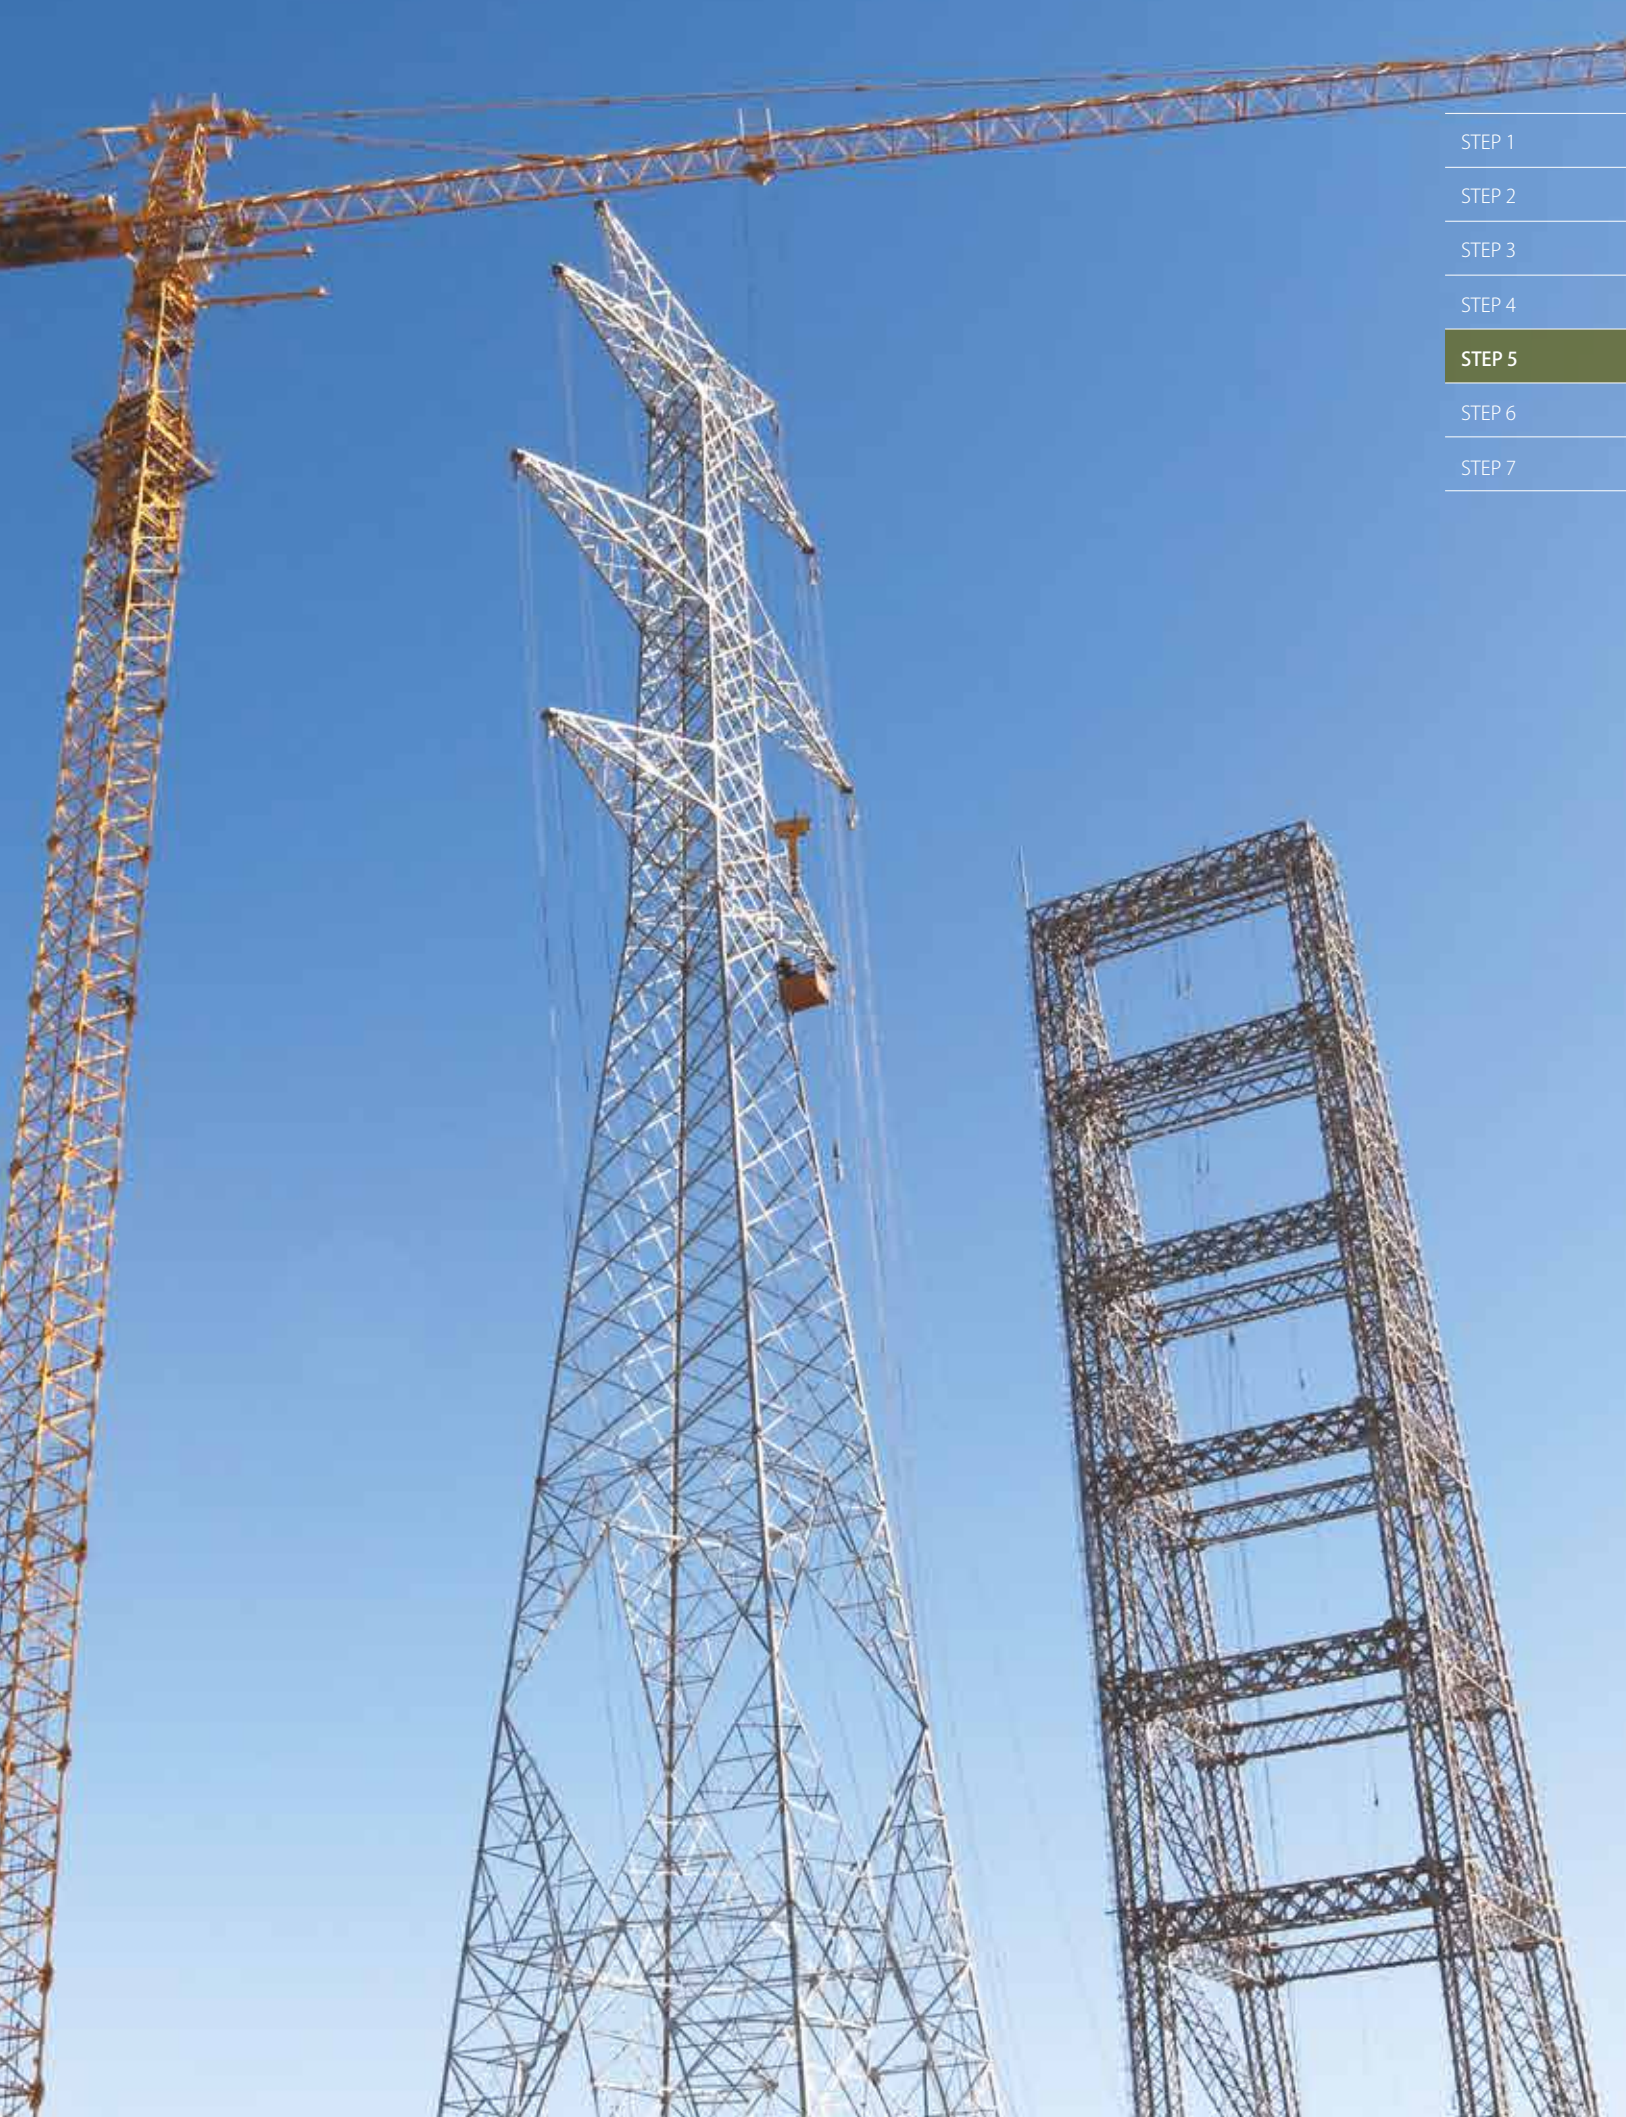

We leveraged our experience across electricity market. Sales of transmission towers were robust in all key infrastructure markets. Our projects impression normally helped us develop more marketing for new projects.

ENGINEERING

BRAIN OF COMPANY

Yasan company is honor to be leading company in number of successful tower type tests in well know test stations around the world. Our engineers design the optimum tower which is able to bear wanted loadings with minimum weight . We highly focused on our engineering because it saves considerable amount of money in projects. Yasan's engineers also utilize a revolutionary exclusive software (YAS TOWER) to design and test towers virtually.

PRODUCTION AND FACILITIES

ARM OF COMPANY

At this stage, allocated resources are utilized conforming to given drawings and plans.

We are equipped with human resources, full automate machineries, and reasonable quality materials in order to serve our clients. All resources come across to accurate production and right timing of delivering products.

All process of fabrication on raw materials including cutting, punching, bending, welding and finally galvanizing in workshops turn them into final products.

Time and resource management in factory is the core competency of Yasan which distinguish us from others.

QUALITY ASSURANCE

EYES OF COMPANY

Quality control is carried out by QC team for production inspection in accordance with relevant standards instruction. Any discrepancy with standards are checked and recorded in a table sheet to monitor in weekly QC reports. These reports give clear vision to QC managers for making right decision. QC team have strict principal which rejects any defect. Independent management system of team ensures company to deliver quality product to clients.
